Art Unit: 2854

Claims 14-23 and 25-52 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on filed on 1-31-05.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 24, drawn to a method of printing, classified in class 101, subclass 483.
- II. Claims 53-67, drawn to apparatus for printing, classified in class 101, subclass 224.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method may be practiced by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A shortened statutory period of 30 days is set to respond.
